

AMENDMENTS TO THE DRAWINGS

I. Objection to the Drawings

The Examiner objects to the drawings for failing to illustrate certain features recited in claims 4 and 5. This rejection is respectfully traversed, as explained below.

As to claim 4, new Figs. 18 - 20 are herein provided which show the features to which the Examiner objects to (as to claim 4). Accordingly, the Examiner is respectfully requested to reconsider and withdraw this objection as to claim 4.

Additionally, the subject matter to which the Examiner objects to in claim 5 is disclosed in the existing drawings. More precisely, Fig. 15 illustrates a fiber (F) laser light source (122) including an excitation light source 122 which emits excitation light (121), on optical fiber doped with at least one rare earth element 126, where the at least one rare earth element includes Pr3+ (see page 29, line 11, of the instant specification), and a wavelength conversion element (130) which converts the laser beam (123) into ultraviolet laser light (125). In light of the previous, the Examiner is respectfully requested to reconsider and withdraw the objection as to claim 5.

Attachment: Three (3) New Sheets of Drawings (Figs. 18 - 20)
